

Preface to Revised State Vehicle report

During an audit of the state vehicle report it was found that there were 81 vehicles omitted from the report. These vehicles were primarily located within Higher education, with the exception of three vehicles located at the Department of Transportation.

Figure 1 shows the departments affected by the changes in count for 2002

State Vehicle Report Explanation and Definitions

Purpose of the State Vehicle Report

The State Vehicle Report is submitted to the Legislature in accordance with UCA 63A-9-402 by the Division of Fleet Operations (DFO). This report contains vehicles defined by UCA 63A-9-101.

- (6) (a) "Motor vehicle" means a self-propelled vehicle capable of carrying passengers.
(b) "Motor vehicle" includes vehicles used for construction and other non-transportation purposes.

The State vehicle report is generated from DFO's fleet tracking database called Computerized Automotive Resource System (CARS). The State Vehicle Report contains a list of all vehicles that are included in the CARS system in an Active Monthly (AM) and an Active Daily (AD) procurement status for all agencies as defined in UCA63A-9-101.

- (1) (a) "Agency" means each department, commission, board, council, agency, institution, officer, corporation, fund, division, office, committee, authority, laboratory, library, unit, bureau, panel, or other administrative unit of the State.
(b) "Agency" includes the State Board of Education, the Office of Education, each Applied Technology Center, the Board of Regents, the Institutional Councils of each higher education institution, and each higher education institution.
(c) "Agency" includes the legislative and judicial branches.

Explanation of Vehicle Count

In accordance with UCA 63A-9-402 (2)(a)(b) the Division of Fleet Operations is required to submit a State Vehicle Report on or before November 1, each year, that discloses the total count of vehicles in the state fleet. This year the total vehicle count in the fleet is 7363. There have been a total of 21 expansions approved by legislative subcommittees for the year.

The movement of vehicles in and out of the fleet as they are purchased and sold is an on-going process. For this reason the vehicle count can vary from one time period to the next. A snapshot of the fleet can be easily taken showing breakdown of the vehicles at a particular date and time. However, when the vehicle count is compared from day to day or month-to-month, the count often varies. With that in mind the month of October is traditionally the best time of the year to take a vehicle count because it is the slowest season of the year for vehicle deliveries and sales.

State Vehicle Report Changes from last year

Two primary factors have affected the fleet count for the last year. First, the Legislature approved 21 expansion vehicles for different agencies*. Second, Utah State University began documenting vehicles that were Federally purchased and licensed in Fleet Anywhere**. Figure 1 shows the effect of removing these two factors. The second part of figure 1 shows a count of vehicles by department.

Equipment Classes Included/Excluded in the State Vehicle Report

The Division of Fleet Operations allows the tracking of non-vehicle fleet equipment within CARS. This allows the state to gain the greatest value from existing software resources. Equipment being tracked in CARS, that does not fall under the definition of a vehicle, is not tracked by DFO and is not reported in the State Vehicle Report. The

attached charts show which classes of vehicles are included and which are excluded from this and future State Vehicle Reports.
